Pathologist Review --	

RBC indices and features suggestive of
thalassemia or hemoglobinopathy. Recommend
hemoglobin fractionation only if status unknown.

Hemoglobinopathy/Thalassemia Investigation

Hemoglobin Investigation

Hemoglobin A2	LO 0.022	0.023 - 0.034
Hemoglobin C/Total Hemoglobin	NOT DETECTED	
Hemoglobin E/Total Hemoglobin	NOT DETECTED	
Hemoglobin F/Total Hemoglobin	<0.010	0.000 - 0.020
Hemoglobin S/Total Hemoglobin	NOT DETECTED	
Hemoglobin Fractionation Abnormal Peaks	A Hb A2 level that is not elevated largely excludes Beta thalassemia trait, but not Alpha thalassemia. If Alpha thalassemia is suspected, please order a Hb H Preparation.
